Principal publications*

Papers in the international peer-reviewed scientific journals:

39. F. Bouchut, J. Le Sommer and V. Zeitlin, Frontal geostrophic adjustment and nonlinear wave phenomena in one-dimensional rotating shallow water. Part II. High-resolution
42. J. Le Sommer, G.M. Reznik and V. Zeitlin, Nonlinear geostrophic adjustment of long-wave
p. 135 – 170.
43. V. Zeitlin, Self-consistent finite-mode approximations for hydrodynamics of
44. R. Plougonven and V. Zeitlin, Lagrangian approach to geostrophic adjustment of frontal
45. F. Bouchut, J. Le Sommer, V. Zeitlin, Breaking of equatorial waves, 2005, Chaos . 15,
013503-1 - 013503-19.
46. V. Zeitlin, On self-consistent finite-mode approximations in (quasi-) two-dimensional
48. G.M. Reznik, and V. Zeitlin, Resonant excitation of Rossby waves in the equatorial
wave-guide and their nonlinear evolution, 2006, Phys. Rev. Letters, 96, N°3, 034502 -1-
034502 -5.
49. J. Le Sommer, H. Teitelbaum and V. Zeitlin, Global estimates of equatorial inertia-gravity
50. J. Le Sommer, E. Scherer, and V. Zeitlin, Inertial motions during the transient adjustment
of a density anomaly in the equatorial ocean: applications to the Western Pacific warm pool,
51. G. Reznik and V. Zeitlin, Nonlinear dynamics in the semi-transparent equatorial
waveguide. Part 1. Resonant excitation of Rossby and Yanai waves and their interactions,
52. G. Reznik and V. Zeitlin, Resonant excitation of waves in the equatorial waveguide with
064501-4.
53. S. Medvedev and V. Zeitlin, Turbulence of near-inertial gravity waves in the continuously
54. V. Zeitlin, Coupling of balanced and unbalanced motions and inertia-gravity waves
55. F. Bouchut, E. Scherer, and V. Zeitlin, Nonlinear adjustment of a front over escarpment,
56. A. Spiga, H. Teitelbaum, and V. Zeitlin, Identification and separation of the sources of
57. E. Scherer and V. Zeitlin, Stability and nonlinear evolution of coupled geostrophic density
58. G. Reznik and V. Zeitlin, Resonant excitation of coastal Kelvin waves by inertia-gravity
59. J. Gula, R. Plougonven, and V. Zeitlin, Ageostrophic instabilities of fronts in a channel in a
60. G. Reznik and V. Zeitlin, Resonant excitation of Rossby and Yanai waves in the presence
– 392.
61. J. Gula, V. Zeitlin and R. Plougonven, Instabilities of two-layer shallow-water flows with
67. B. Ribstein, J. Gula and V. Zeitlin, (A)geostrophic adjustment of dipolar perturbations, formation of coherent structures and their properties, as follows from high-resolution numerical simulations with rotating shallow water model, 2010, Phys. Fluids, 22, 116603-1 -- 116603-14.
76. N. Lahaye and V. Zeitlin, Decaying vortex and wave turbulence in rotating shallow water model, as follows from high-resolution direct numerical simulations, 2012, Phys. Fluids, 24, 115106-1 – 115106-13.
79. V. Zeitlin, Resonant excitation of coastal Kelvin waves in the two-layer rotating shallow

Book chapters:

97. J. Le Sommer, V. Zeitlin, Tracer transport during the geostrophic adjustment in the

Monographs

Original results published in reviewed proceedings and communications **

108. V. Zeitlin, Supersymmetric mechanics of a material point - 1975, Proceedings of the USSR Conference of Young Scientists, 3 p, Novosibirsk.
110.A. Sorin and V. Zeitlin, High-temperature asymptotics of the thermodynamic potential in perturbative $QCD$ with massive quarks - 1986, Institute of Theoretical Physics Communications ITP -86 -99E, Kiev.
112.P. Caillol and V. Zeitlin, On the stationary energy spectra of the stratified fluid in a weak

*) The spelling of my name in publications submitted from ex-USSR or translated from Russian varied: TZEITLIN, TSEYTLIN, ZEITLIN.
**) Extended abstracts/proceedings published without proper reviewing process are not included
